**ALTERNATE TO WOOD
SAVE TREE SAVE WORLD**

CARPENTER FRIENDLY –

Majestic WPC is door and door frame work in complete supplements to plywood. There is no additional knowledge / skill required in working in it. It adapts all traditional tools and can be cut, Screwed, Drilled, Milled, polished, etc. With less abrasion and or friction with the structure the tool life increases. It is very friendly with hand polish, PU, Matt, Lamination, veneering. For fabrication – with utmost ease- it works well with all standard wood working machines like board saw CNC router and multi boring.

PURPOSE OF WPC PRODUCT

Now the world looks towards Green building concept. The main goal of green building concept is to maximum possible material which can be recyclable and not effect to environment ecology. Expansion of cities and spike of population impacting directly and indirectly to the environment. And here WPC product having the potential to save the word from worst impact of deforestation. Use WPC door and door frame instate of wood will be the measure step towards the health of earth.

Goals of GREEN BUILDING

- Protect our health by saving trees
- Materials Efficiency
- Waste reduction
- Maintenance optimization
- Eco-Friendly

By use of the recyclable WPC product one of mighty step towards humanity & environment. In short, we can say WPC is blessing for the earth.
